- React
- Selenium
- Jest

### LANGUAGES

- Polish - native
- English C1

### INTERESTS

- Motorcycles
- Diving
- Computer Games
- Stock market
- Cooking
- Flowers

### Profile

Graduate of computer science with experience across the automation testing and front-end software development. I contributed in 5 different projects. In my last role the main theme was experimentation. As a result I was focused on making AB tests on popular gambling site. I am familiar with feature creation, release flow starting with contacting design and analytics data teams, through release process and finishing on testing. Regarding non-technical experience I was mentor for intern that joined our team. I am looking for a role where I can grow and continue to learn from other experienced team members.

In my free time I ride my motorcycle with my friends. I love meeting new people, good time cooking asian food and playing video games. Recently I got certified as Padi Open Water Diver, I fell in love with discovering the underwater world.

### WORK EXPERIENCE

05.2022 – 12.2022 Seibersdorf Labor Software Developer

- creating Powershell scripts

Used: Windows Powershell 7

07.2019 – 12.2022 Grand Parade
